DuPont Country Club

Presented by

About DuPont Country Club

DuPont Country Club is the premier championship golf course in the heart of the Brandywine Valley. The club offers two beautiful 18-hole golf courses, spread across acres of lush landscape.

The unique courses use the natural bumps, dips and turns of the countryside, creating challenging games for all golfers. Several practice areas — such as a chipping green, a driving range, a practice bunker and putting greens — are all available to warm up before playing. The stunning landscape, exquisite playing corridors, tees and holes, and first-class service create the perfect DuPont hospitality experience for you to enjoy.

Nemours Children's Health | Delaware Golf Tournament

Avid golfers from across the Delaware Valley will enjoy a great day on the greens, and receive a special gift for participation in support of the children and families who need our internationally regarded care for acquired brain injuries. With your help, we will create a brain injury social integration support group to support patients as they return home. The tournament will take place at the picturesque DuPont Country Club in Wilmington, Delaware. Your day will include breakfast, a Bloody Mary bar, lunch, refreshments on the course and dinner.

WHAT:

16th Annual Delaware Golf Tournament

WHEN:

Monday, September 22, 2025

WHERE:

DuPont Country Club
1001 Rockland Rd., Wilmington, DE 19803

EVENT SCHEDULE

- 10 a.m. Registration Opens
- 11:30 a.m. Shotgun Start Scramble
- 4 p.m. Dinner and Awards

PROCEEDS BENEFIT:

Rehabilitation Treatment and Support for Kids with Acquired Brain Injury

Debilitating Pain. Cognitive Impairments. Crippling Isolation.

These are outcomes that can affect children with an acquired brain injury who don't have access to rehabilitation care. Proceeds from the Delaware Golf Tournament will allow us to expand our reach for kids who need life-changing treatment and support.

With your participation, we will create a brain injury social integration support group as part of our unrelenting

commitment to treat the whole child, including their developmental, physical, emotional and behavioral needs.

The rehabilitation program aims to return children who have experienced an acquired brain injury to their home and school environments, maximizing their ability to move, communicate, interact with people, and live as independently as possible.
